COSTSYS

THE JOB COSTING SYSTEM FOR MICROSOFT WINDOWS

This leaflet describes the key features of COSTSYS Job Costing. COSTSYS will help businesses (for example, Restaurants, Bakers, Builders), manage and monitor the costs of their ad-hoc and standard jobs, services, products and general projects.

COSTSYS is a Microsoft Windows compatible product, running either on a standalone PC or on a network. Almost any PC built within the past 10 years will run CostSys. The program runs on all versions of Windows from Windows XP to Win10, and on 32-bit or 64-bit architecture.

COSTSYS requires Microsoft Access 2003 or later, but can also be supplied with Microsoft Access Runtime, which may reduce some aspects of functionality, although not within the CostSys program itself.

COSTSYS builds on the functionality of our MS-DOS CostSys Costing package, which had been in use since 1986, prior to its replacement by this MS-Windows version. COSTSys can be integrated with ACCOSYS accounts (with additional costs).

COSTSYS models the costing aspects of your products and services, including your:

- Commodities** (ingredients/materials) with units of use, waste, fixed costs;
- Jobs** (products), including the commodities and quantities and markups involved;
- Projects** are collections of jobs performed for a specific client;
- Direct Costs** can be entered for *ad-hoc* invoice cost recording.

To find out more about this useful product, and to see how you might use it in your business, please read on ...

COSTSYS: An Outline

COSTSYS stores the following user-definable types of information:

- Codes:** a set of user-defined codes to cover all aspects of the system. For example: "Address Types", "Roles", for your supplier and client Organisations, and "Units of Use" for your Commodities.
- Organisations** very flexibly defined to allow all kinds of user-defined organisation attributes to be recorded: e.g. "Customer", "Supplier".
- Addresses** unlimited organisation addresses, date ranged and with user-defined types (e.g. "Delivery", "Payment", "Main").
- Commodities** details of the elements which go into your products and services, each with a wide range of user-defined and fixed attributes stored.
- Jobs** groups of commodities, with quantities, markup, yield and other attributes, to define your products and services.
- Projects** collections of direct costs and pre-defined jobs, with quantities, made up, costed and reported as carried out for your client organisations.

Standard Reports permit the printing of Commodity, Job, and Project records. An optional User Module (£50.00) permits addition of your own reports and queries.

Screenshot showing a Commodity Detail Record

The screenshot shows the 'Commodities' window in COSTSYS. The title bar reads 'CostSys (c) KA Spencer (Software) - [Commodities]'. The window has a menu bar (File, Edit, View, Insert, Format, Records, Tools, Window, Help) and a toolbar with buttons for Help, Close, New, List, Sort on (COMCODE), Via list (2002), and Find. Below the toolbar is a grid of letters A-Z for navigation. The main area contains form fields for Name (Anchor 2002, Black trays), Code (2002), Cat'gue No., and Type (Packaging). It also has fields for Unit of Use (singles), Unit Cost (0.09), Waste% (3.00), Fixed Cost (0.00), and Fixed Cost Type. A description field contains 'Anchor Pack. Trays'. At the bottom, there is a table for 'Suppliers, prices and price bands' with columns for In, At, Min, Max, Curr, Buy at, VAT%, Cost, Date from, Date to, and Note. The table shows a single entry for Anchor Industries Europe with a cost of 43.70 and a date from 08/09/1999.

COSTSYS Order Form

Please send _____ copy/ies of the COSTSYS Job Costing System for MS-Windows. (CD, release note and online manual.)

Name: _____ Position: _____

Organisation: _____

Address: _____

(Please enclose cheque payable to **KA Spencer** or an official signed Purchase Order)
NB: CostSys may also be supplied with MS-Access 2003 runtime, at a small reduction in flexibility, when full Access 2003 onward is unavailable. Please enquire.

Screenshot showing a Job Detail Record.

The screenshot shows the 'Jobs' window in COSTSYS. The title bar reads 'CostSys (c) KA Spencer (Software) - [Jobs]'. The window has a menu bar (File, Edit, View, Insert, Format, Records, Tools, Window, Help) and a toolbar with buttons for Help, Close, New, List, Sort on (JOBCODE), Via list (BRUNCBITES), and Find. Below the toolbar is a grid of letters A-Z for navigation. The main area contains form fields for Name (Smoked Salmon Crepes with Dill Butter 2), Job Code (CREPED12), and Yield (192). It also has fields for Yield Cost (192.17), Waste Cost (14.00), Markup % 1 (30.00), Calculate Trade price (checked), Markup % 2 (40.00), Calculate Selling price (checked), Fixed Cost (0.00), Unit Cost (1.07), VAT % 1 (0), Trade Price (1.40), VAT % 2 (0), and Selling Price (1.95). A description field contains '2 X 21g Crepes with 65.5g bechamel and pellicule filling and one 5g butter pat, presented in a black tray and boxed 8/C9 for Supermarkets'. At the bottom, there is a table for 'Commodities in Job' with columns for Commodity, Quantity, Unit, Qunty cost, Fixed cost, Waste cost, and Sub total. The table lists various ingredients like Dill Butter, Butter Crepe, Dill, Smoked Salmon, Bechamel Sauce, Despatch Labour, and High Risk Labour.
