## RM-SYS

### THE RESOURCE MANAGEMENT SYSTEM FOR MICROSOFT WINDOWS

This leaflet describes the key features of RM-SYS, the Resource Management System, which is designed to assist organisations involved with the loan, sale, or permanent issue of any kind of resource (books, videos, leaflets, slides, CDs, or even building tools) to their customers or clients.

RM-SYS is a Microsoft Windows (version XP to Win10, **32 bit only** - not 64 bit) compatible product, running either on a standalone PC or on a network. The minimum requirements to run RMSYS are such that almost any PC sold in the last 10 years will be sufficient. .

If your business is concerned with the management of resource bookings and returns or the regular, or ad-hoc supply of leaflets or other materials on request from your customers, then RM-SYS is just what you need. RM-SYS contains a complete catalogue of your resources and stock, combined with a database of your suppliers and customers, which are useful enough on their own. But in addition, RM-SYS records and organises each transaction involving any of your customers, resources or stock, and will keep you informed about when to send an item out, and when to expect its return.

A simple to use, but powerful Windows interface provides all the information you need by pressing buttons and picking from lists.

To find out more about this useful product, and to see how you might use it in your business, read on ...

## RM-SYS: An Outline

RM-SYS stores the following user-definable types of information:

- Events** e.g. Booking, Order, Return, Loss. Up to 990 definable.
- Targets** e.g. Doctors, Teachers, Parents. Up to 990 definable.
- Keywords** e.g. Book, Video, Tape. To associate with Stock and Resource items. Up to 990 definable. Can be very flexibly defined to allow all kinds of resource attribute to be recorded.
- Organisations** up to 3,000 definable, each with a range of details and a complete loans/issues and transaction event history.
- Resources** up to 3,000 loanable items definable, each with a range of details (e.g. keywords, targets, supplier).
- Stock Items** up to 3,000 saleable/issue items definable, each with a range of details (e.g. keywords, targets, stock level).
- Transactions** up to 6,000 transactions can be current at any time. Details include all dates, quantities, customer, stock item/resource.

Historical details (those from previous years or periods) of all the above are available on-line, up to the capacity of your hard disc.
