SALESYS

THE INTEGRATED SALES MANAGEMENT SYSTEM FOR MICROSOFT WINDOWS

This leaflet describes the key features of SALESYS, the Integrated Sales Management System which helps businesses, sole traders and other organisations record and monitor sales and other information about their business activity.

SALESYS is a Microsoft Windows XP to Win10, 32 or 64 bit, compatible product, running either on a standalone PC or on a network. Almost any PC manufactured within the past 10 years should run SaleSys satisfactorily.

NB: SALESYS requires Access 2003 onward.

SALESYS contains a subset of the functionality of our AccoSys Accounts package, being designed to concentrate on managing sales, and providing Sales information.

SALESYS can model most of the aspects of your sales business, including your accounting departments, customers, suppliers, commodities, purchasing, sales, stock, ordering, invoicing, serial number tracking and warranties. SALESYS employs user-defined codes so that you can be sure that your business can be flexibly represented. If you choose to enter your purchases into SALESYS then you can also obtain Profit and Loss information, even to individual commodity level.

Purchases and sales can also be tracked at serial number level, including recording of batch and serial numbers, dates of manufacture, warranty and shelf life expiry.

A wide range of reports are built-in to the system, and you have the option of a user module into which you can add your own reports and queries.

To find out about SALESYS, and how you may use it in your business, read on ...

SALESYS: An Outline

SALESYS stores the following user-definable types of information:

- Departments** accounting headings: e.g. "Sales Income", "Costs", "Expenses".
- Ledgers** transaction lists: e.g. "Sales", "Purchase"
- Organisations** very flexibly defined to allow all kinds of user-defined attributes to be recorded: e.g. "Customer", "Supplier".
- Commodities** details of all products and services with a wide range of user-defined and fixed attributes stored.
- Stock Batches** allow full stock item tracking from purchase order to sale despatch
- Transactions** user-defined Ledgers, Transaction Types (e.g. "Order", "Invoice", "Payment") with unlimited detail lines.
- Addresses** unlimited organisation addresses, date ranged and with user-defined types (e.g. "Delivery", "Payment", "Main").
- Rôles** user-defined roles for organisations (e.g. "Customer").
- Contacts** multiple contact details in each organisation.
- Reports** a wide variety of standard reports is provided. Invoice, Order, Remittance, and other business forms are built in.

Users may add reports and queries when the optional user database is also purchased.
