## TRACSYS

### THE WORK TRACKING SYSTEM FOR MICROSOFT WINDOWS

This leaflet describes the key features of TRACSYS, the Work and Job Tracking System. If you are a company which sends operatives out to perform work on client sites (e.g. property maintenance, repairs, building contracts) this application package will help you keep track of work, and maintain invoices and reports. .

TRACSYS is a Microsoft Windows XP to Win10, 32 or 64 bit, compatible product, running either on a standalone PC or on a network. Almost any PC manufactured within the past 10 years should run TracSys satisfactorily.

**NB:** TRACSYS requires Access 2003 or later to be installed on the PC.

Each new job requested by your clients is easily logged, and its progress can easily be planned, recorded and monitored.

Full details of your clients - organisations or individuals for whom you may do contracted or ad-hoc work, are maintained.

Your work records of jobs completed, planned or underway are easily maintained, and as jobs proceed you can easily check progress. Each work request can go through as many (user-defined) stages as you wish, from quotation to completion.

Reports are readily produced showing the desired level of detail and any aspect of work covered that you wish. Reports can be viewed on screen or printed, as desired.

TRACSYS employs user-defined codes so that you can be sure that your business can be flexibly represented

To find out about TRACSYS, and how you may use it in your business, read on ...

## TRACSYS: An Outline

TRACSYS stores the following user-definable types of information:

- Departments** accounting headings: e.g. "Sales Income", "Costs", "Expenses";
- Ledgers** transaction lists: e.g. "Sales", "Purchase"
- Organisations** your customers, clients, and suppliers -very flexibly defined to allow all kinds of user-defined attributes to be recorded;
- Addresses** unlimited organisation addresses, date ranged and with user-defined types - e.g. Delivery/Payment/Main;
- Rôles** user-defined roles for organisations (e.g. "Customer").
- Contacts** multiple contact details in each organisation.
- Codes** an elegant system of user-defined codes allows you to define all of the types of work details which you carry out for your clients;
- Work records** of jobs completed, planned or underway are easily maintained, and as jobs proceed you can easily check progress. Each work request can go through as many (user-defined) stages as you wish, from quotation to completion;
- Reports** a wide variety of standard reports is provided. Invoice, Order, Remittance, and other business forms are built in.
